

About Us

WebPortal™, as the Internet brand, has been in business since 2003., and since 2004. we have become a part of the company SBS from Kragujevac in charge of Internet development and marketing. There is a team supporting us for years successfully performing tasks in the field of online programming, marketing and graphic design. We are fully turned towards the relationship with customers and we are primarily focused on the quality of our services. We optimize our web and hosting packages for the needs of legal and natural persons. Our aim is, besides building our own image, to help you to present yourselves in a better and more adequate way to a wide layer of potential customers worldwide. The central office is in Kragujevac, so the geographical position of the city itself, in the central part of Serbia, provides excellent business communication and familiarity with all companies in the country. Since the half of 2007, our company, in accordance with pre-set goals, has become available to customers in Western Europe, via its network managers, so for this purpose we have opened our business unit in Munich, Germany. In addition to our physical presence, the Internet, as a global means of communication, enables a great relationship and communication with companies from the entire world. WebPortal ™ Group units 2 services, which are grouped according to the type of tasks carried out.

- WebPortal™ Development is responsible for creating websites, programming and provides a basis for our business. In addition to creating the complete presentation, we deal with redesign of the existing web sites. In the end of 2005. we are our own CMS solution on the market.

- WebPortal™ Hosting Solutions deals with the web site hosting and local rs domain registration, as well as international domains (. Me. Eu. Com,. Net,. Org,. Info,. Biz,. Tv, fm. Mobi). Besides the new domain registration and hosting, we are ready to provide very favorable conditions of transfer of existing sites on our servers. In addition to the core business that we do, we can create a complete marketing solution for you, starting from the logos, business cards, presentation of products - a catalog, or CDs, flyers, brochures, ads... Our primary goal is to design the site, which is graphic stimulant and effective and will always be available for the final visitor. We have been achieving this carefully balancing the advanced technology against rich content along with optimization for the minimum time needed to upload your site. The final result is the appearance and feeling that our customers wanted!!!
