

## Hosting solutions

Can one so functional web hosting service be offered in a different way in relation to the way in which it is presented by our web hosting service providers? Analyzing the current offer, we must accept the fact that it is mostly copy / paste philosophy of business without (any) attention to the stability and functionality of web hosting service that is being provided, which, as a result, happens to the great detriment of all web hosting clients who are looking for a quality web hosting partner.

Not remaining only on talk, what is behind the talk should be mentioned too. WebPortal &trade; Hosting Solutions has created a team of excellent experts building their experience in web hosting for many years. Therefore, it is logical that the great attention is devoted to all those factors that are really necessary for the flawless functioning of web hosting system to the satisfaction of all web hosting clients. Firstly, fast and quality hosting servers in the USA should be mentioned, which is, with technical support, 0-24, 7 days a week, 365 days a year, a reason for great reliability. Administration of the domain is done only by you, via the Internet and the adequate applications specially developed for this purpose. Because of all the above, we are ready to provide a high quality service and low cost for you, which, until now, you haven't had in the domestic market. Following the world trends in the field of hosting, WebPortal&trade; Hosting Solutions continues the introduction of new web hosting servers and technology, so it is enabled to all our Linux hosting packages users to use cPanel-a 11 for administration of web sites, Fantastico De Luxe-a range of free Internet applications, as well as the last versions of PHP and MySQL (PHP 5 and MySQL 5).
