

## Dedicated servers

Dedicated servers are major DELL servers of latest generation, located in Houston (USA) and they are intended for the users with the most demanding needs for server resources. A user rents the entire server with which he gets more possibilities that cannot be found on the regular shared web hosting. All servers are based on the Linux platform, and depending on the needs of a final user, you can choose one of our offered configurations. Accommodation of server is in top conditions, the real price is competitive with all World datacenters, and the possibility of the service "a complete server administration" makes our offer an excellent choice.

If you decide for our servers on the Linux OS platform, with your future dedicated server, you receive a Web Hosting Manager (abridged WHM) for a superior administration to its current and future users. However, WHM is the world famous tool used by many well-known Hosting home abroad, which standardly comes in a package with Cpanel management system, and from WHM you can add, delete, modify users accounts, track monthly traffic of your users, add and modify the IP addresses, change the DNS zones of individual users accounts and more. cPanel, which represents a new generation of a web hosting control panel system.

This service is intended for demanding users regardless of whether it is natural or legal persons who do not want to share hosting services on the server with other users. On the market, the service is often seen under the name "dedicated".

If you are thinking about whether this is the right service for you or not, you should first ask what you want to achieve with your site and what the traditional web hosting or dedicated hosting offers you, and then decide which of these solutions will better match.

Finally, you are the ones who decide what is best for you!

Dedicated server prices are, due to the changes at the global level, subject to frequent changes, so it is best to contact us by phone or e-mail to send you to the current bid.

Prices range from &euro; 120 per month for the Intel Celeron 2.0GHz, 80GB, 512 MB RAMS with 750 GB of bandwidth and up to &euro; 450 for Intel Dual Xeon 3.2GHz (4CPU), 2x146GB 10k RPM SCSI / SAS, 4GB RAM, and 2500GB monthly flow data.

Dedicated servers with the administration:

- Preparation and server setup
- Setup of the DNS servers
- Security setting
- Optimization of performances
- Replacements and upgrades of hardware
- Update of software
- Monitoring of servers

The minimum length of the lease is 2 months. When the use of the server is stopped, it must be announced 30 days in advance.
