

cPanel® 11

cPanel® 11 is the world's leading Control panel. It is a special developed application that is completely web-oriented thanks to which you can manage your hosting account to WebPortal ™ Hosting Solutions servers. The current version on our servers is cPanel 11.j

You open a new email address through cpanel, set up autoresponder, you can track statistics of visits, free disk space, "park" the new domains, set redirection, make your 404th page, control FTP, mySQL database control, backup site, adjust front page extensions, set the counter, guest book (guestbook), set chat room, make a small forum, set a shopping cart for sale over the Internet, set Crone (an application that is periodically done automatically), set hotlink protection, see the mail via the web, prohibit access from some IP address...

cPanel is included in all of our hosting packages (except Portal package). To access the cpanel on your site, simply type www.yourdomain.com/cpanel or www.webportal.rs/cpanel and then enter your username and password. CPANEL
